Speaker Bio

Dr. Tittle maintains a full time private practice in endodontics in Pleasant Hill and Walnut Creek, CA. He is an Assistant Professor of endodontics at the Arthur A. Dugoni University of the Pacific School of Dentistry and has lectured to local dental societies, the CDA, the ADA, and The American Association of Endodontists on various aspects of Endodontics. He is a Diplomate of the American Board of Endodontics, a fellow of the American College of Dentists and is currently on the board of President of the California State Association of Endodontists. Dr. Tittle has also passed the written exam to become an Associate Fellow to the American Academy of Implant Dentistry.

Course Content Outline:

Root canal treatment is often non-visual. This can lead to some frustration in efforts for assistants and dentists to effectively work together. This lecture will describe the fundamental goals of Endodontic therapy and recent advances in treating diseases of the dental pulp with emphasis on how staff can affect treatment.

Educational Objectives:

Upon completion of this course, participants will be:

- Able to describe typical symptoms requiring root canal therapy.
- Familiar with goals of endodontics and recent advances in technologies used in endodontic treatment
- Facilitate teamwork in providing Endodontic care.
